

MASTER OF SCIENCE

ECOLOGICAL RESTORATION

Introducing an exciting new opportunity in graduate studies in ecological restoration! This unique program, jointly offered by the British Columbia Institute of Technology and Simon Fraser University, combines course work, practical application, research and technical skills to produce graduates who will fundamentally advance both the practice and science of ecological restoration across the globe.

Ecological Restoration is a growing field: the increasing need to restore degraded and damaged ecosystems and the need to rehabilitate habitat for threatened and endangered species has led to the high demand for ecosystem restoration work across BC, Canada and internationally.

Learn more about this four-term, two-year professional program by visiting www.bcit.ca/m300msc or www.sfu.ca/ecologicalrestoration
